If Clark writes the Sentry and they are as eager to make news as I believe, we should shut them down immediately after the first editorial. The committee was created to assist the board with positive suggestions and to encourage success with levy action, not to tear the school system apart with questions that seem "important" to the system yet in reality are creating doubt in the community. If Clark or any other member of the committee write such an article, I would immediately move to disband the committee, thanking them for their time and efforts and move on to forming a committee under a new name, made of strong community leaders.

Dick

I listened to Catherinine being attacked and Kevin Clark calling Dr. Jones a liar. She also gave me a run down on the questions Rod Armstrong was asking, he himself not having any substantiated data to back up his numbers. Since you are the newly appointed liason, I think it is time we begin to shut down this committee. I think they have taken their responsibility too far and now can do damage to our levy as Kevin Clark plans on doing with the Stow Sentry. I will be right next to you when you deem it necessary to eradicate, disassemble, export or otherwise shut them down.

My suggestion would be to say they no longer have direct input to the Board, and if they wish, they can still have their meetings as community members.

Enough said. Your thoughts.
